Arlliwiau

Information

- Ingredients
- Dwarven spirit
 - Nekker heart
 - Duñak's sap

Base Azoth

Follow on IG TikTok Join Fan Lab

Contraeffect (s)	Very severe headaches accompanied by some dizziness for about 1 day also nausea and vision problems
Toxicity	Medium
Duration	4- 6 hours

Brewing

The method for preparing the Arlliwiau potion is as follows:

1. Begin by crushing equal parts of Nekker's heart and Duňak sap, and add them to a pot of boiling water.
2. Next, add a few drops of Azoth to the mixture and stir.
3. Once the mixture has simmered for a few minutes, strain out the solids and set the liquid aside.
4. In a separate pot, add a small amount of Dwarven Spirit and bring it to a simmer.
5. Add the strained liquid from step 3 to the Dwarven spirit, and simmer the mixture for a few minutes.
6. Bottle the potion and allow it to cool before using.

It's important to note that the quantities of the ingredients and the timing of the simmering may vary depending on the desired strength of the potion. It's also important that the ingredients are fresh and of the best quality. Additionally, the Dwarven Spirit is optional, it's not a necessary ingredient but it helps to preserve the potion and also adds a better flavor.

Effects

Arlliwiau is a potion that can be particularly useful for witchers who travel through snowy regions, as it reduces sensitivity to light and helps to reduce the glare from reflected sunlight. Upon consuming the potion, the witcher's eyes will adjust to the bright

light and make it easier to see in snowy conditions. This allows the witcher to better navigate through snowy areas and avoid obstacles that would otherwise be difficult to see.

Arlliwiau potion effect in the witcher's eyes

In addition, the potion also enhances the witcher's visual acuity, allowing them to see more clearly and pick up on details that would otherwise be difficult to notice. This is especially useful when hunting or tracking in snowy regions, as it allows the witcher to pick up on subtle signs that would otherwise be missed.

The potion also has a mild calming effect, helping the witcher to stay focused and reducing the effects of eye strain caused by prolonged exposure to bright light.

Contraeffects / Side effects

Some of the potential side effects of consuming Arlliwiau potion are:

- **Dizziness:** Consuming Arlliwiau can cause dizziness, especially if the witcher moves around shortly after consuming the potion.
- **Nausea:** Some witchers may experience nausea after consuming the potion, this is due to the potion's effect on the eyes and the brain.
- **Vision problems:** The potion can cause temporary vision problems, such as blurriness or double vision.
- **Headaches:** Consuming Arlliwiau can cause headaches, especially if the potion is consumed in large doses or if it is consumed too frequently.
- **Insomnia:** The potion can cause insomnia if consumed too close to bedtime, as the calming effect of the potion can keep the witcher awake.
- **Very severe headaches accompanied by dizziness for about 1 day**

The effects of Arlliwiau usually last for about 4 to 6 hours.

It's important to note that these are potential side effects, and may vary from person to person. It's also important to keep in mind that the side effects may be more severe if the potion is consumed in large doses or if it is consumed too frequently.
